

CYLINDER SERIES

MUCH MORE
THAN A
GEOMETRIC
SHAPE

Turning a simple geometric shape into a design object, giving it the immense power to illuminate outdoor spaces by joining elegance, discretion and attention to detail.

**WITH
THIS IDEAL,
WE HAVE
CREATED CYLINDER:
THE NEW ENTRY IN
SURFACE-MOUNTED
LIGHTING
PRODUCTS
FOR OUTDOOR
CEILING
INSTALLATION.**

CYLINDER is not a simple lamp, or a simple three-dimensional geometric figure.

CYLINDER is the exact blend of what its shape can offer and what PUK's lighting technology can bring to the world of outdoor lighting, the result of more than 30 years of experience.

CYLINDER MICRO COB
scale 1:1

Contrary to popular belief, lighting design based on externally mounted downlight products is not an alternative solution to an in-ground luminaire installation, but is a deliberate and strongly desired choice to enhance specific outdoor environments.

When it happens? Everytime you want to include in your design an accent lighting that, coming from above, accompanies People to discovery the best environments, or when you want to enhance shapes, colours and patterns of the outdoor ceiling brightening it with elegant lamps, or even when you want to recreate the effect of a shining and impactful sky, where the sinuosity of the lamps emphasises the light emitted.

TECHNICAL DATA

Surface mounted luminaire for outdoor ceiling installation.
phospho-chromatised and polyester powder coated extruded copper-free aluminium body, tempered safety glass, moulded silicone gaskets, with screws in stainless steel.

WATT min - max		6 - 38
lumen package		580 - 4.400

Cylinder

Choose Cylinder
and turn on the light
above you.

We turned a geometric shape into a sophisticated lighting object, characterized by clean and refined aesthetic lines, ready to envelop any outdoor context with its beam of light from above. Its potential does not end there: CYLINDER's power is also expressed in its incomparable versatility.

This product comes on the market in four different variants (MICRO, MINI, MEDIUM and MAXI): from a diameter of just 72mm in the MICRO version to a diameter of 158mm in the MAXI version. Its charm is that, as its size increases, the clean aesthetics and performance it provides do not change. A result achieved thanks to the choice of two different LED types (COB and HP) for all variants - with the exception of MICRO (available with COB LEDs only). In terms of illumination, for the COB versions of CYLINDER you can choose between three different beam angles (narrow 18°, medium 36° and wide 60°) and two different temperatures (3000°K warm-white or 4000°K neutral-white); for the HP versions you can choose between ultra-narrow (4°), narrow (10°) and medium-wide (28°).

... AND IT DOESN'T END THERE: TO ENSURE MAXIMUM VERSATILITY AND THE MOST SATISFYING USER EXPERIENCE POSSIBLE, CYLINDER IS AVAILABLE IN THREE DIFFERENT FINISHES (TEXTURED GRAY, ANTHRACITE GRAY AND MATT BLACK) OR YOU CAN REQUEST A CUSTOMISED FINISH TO SUIT YOUR PLACEMENT NEEDS BETTER!

(on request)

Our advice is to play with light and CYLINDER, combining the different LED sizes and technologies available, to create a real show!

CYLINDER satisfies the lighting requirements of every outdoor context, while also guaranteeing remarkable durability. This is possible thanks to the materials chosen for its creation: phospho-chromatised and polyester powder coated extruded copper-free aluminium body, tempered safety glass, moulded silicone gaskets, with screws in stainless steel.

Its natural application is the outdoor space also underlined by its **IP66 rating**, which certifies its dustproofing and extreme protection against strong jets of water. A blend of materials, technologies and aesthetic choices makes CYLINDER literally infallible in enhancing rooms, providing accent lighting and lasting for many years.
